PROFESSIONAL SUMMARY

Senior Full-Stack & AI Engineer with 12+ years shipping production systems end to end — real-time clinical platforms at Philips Innovation Campus and GE Healthcare, and multi-tenant AI SaaS built from 0 to 1. Pairs deep Java Spring Boot, Kafka and cloud-native microservices experience (AWS, Azure AKS) with hands-on LLM engineering: multi-agent systems, LLM failover routing, RAG and MCP integrations. Owns the whole stack — architecture, React and Node.js product code, Kubernetes, observability and billing — and turns it into measurable results: **70%** faster dashboards, **98%** more efficient APIs, **30–40%** lower MTTR. Immediate joiner, open to Bangalore, remote or relocation.
