PROFESSIONAL SUMMARY

Full-stack engineer with 12+ years of hands-on Java and 6+ years of production React, delivering enterprise systems for healthcare and SaaS clients. Designs Spring Boot microservices with clear service boundaries, secures them with Spring Security and OAuth2, and builds the React and TypeScript frontends on top, with Redux Toolkit for state. Tests at every layer with JUnit, Mockito, Jest, React Testing Library and Playwright. Results include 70% faster dashboards, 98% more efficient APIs and 30–40% lower MTTR at Philips. Works directly with clients and founders to clarify requirements, and mentored 5+ junior developers through code reviews and refactoring toward maintainable design.
