SIDDHANT RANGARI

Backend Engineer · Java, Node.js, PostgreSQL · 12+ Years · Bangalore, India

siddhantrangari@gmail.com · +91 86689 88485 · linkedin.com/in/siddhant-rangari · siddhantrangari.com

PROFESSIONAL SUMMARY

Backend engineer with 12+ years taking features from a clarified problem through shipping and follow-up in production. Builds APIs, background jobs and integrations in Java/Spring Boot and Node.js, works closely with data models, migrations and query behavior in PostgreSQL, and operates what he builds with metrics, logs and traces. Results include 70% faster dashboards, 98% more efficient APIs and 30–40% lower MTTR. Uses AI coding tools every day, reviews and corrects what they generate, and has shipped AI features to production. Comfortable working remotely and asynchronously with clear written updates.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Batch, Node.js (Fastify), TypeScript, Python (FastAPI), REST APIs, background jobs, third-party integrations

Data: PostgreSQL (queues, transactions, 23 schema migrations), MySQL, Redis, TimescaleDB

Messaging: Kafka, RabbitMQ, async workers, retries

Delivery & operations: Docker, Kubernetes (EKS, AKS), ArgoCD, GitHub Actions, Prometheus, Grafana, OpenTelemetry, CloudWatch

AI: AI coding tools with review, LLM integration, MCP tool use, LLM failover

PROFESSIONAL EXPERIENCE

Freelance Solutions Architect — Growlogic Technologies (Eeko.ai) *May 2024 – Dec 2025 · Remote*

- Built and shipped 6 Spring Boot services on Azure AKS for an AI design-and-scheduling SaaS, from requirements with the founder to production.
- Built a Spring Batch background job sending WhatsApp notifications in 100-record JDBC pages with timezone-aware scheduling, with zero missed sends.
- Set up CI/CD with GitHub → CI → ArgoCD → AKS for zero-downtime deployments.

Full-Stack Engineer — Software Technologist II — Philips Innovation Campus *Sep 2021 – Feb 2024 · Bangalore, India*

- Built a real-time patient-monitoring backend streaming vitals from Kafka through Spring Boot APIs with sub-second latency; worked with both Kafka and RabbitMQ.
- Shipped a Kafka → AWS S3 pipeline that cut dashboard load time by 70%.
- Rebuilt an Apache Camel integration as a Spring Boot microservice with proper error handling, logging and monitoring, improving API efficiency by 98%.
- Added metrics, logs and traces (Prometheus, Grafana, Loki, Tempo, OpenTelemetry), reducing MTTR by 30–40%.
- Reviewed code and mentored 5+ junior developers, lifting team delivery by 20%.

Senior Software Engineer — GE Healthcare *Sep 2020 – Jun 2021 · Bangalore, India*

- Built Spring Boot ingestion and transformation services connecting monitoring hardware and EMR systems to clinical dashboards.

Earlier roles

- **Senior Software Engineer — Cropdata Technology** · Jun 2019 – Jun 2020 · Nagpur, India — Spring Boot microservices and REST APIs, improving pipeline reliability with external data providers.
- **Software Engineer — Ajanta Photo and Technologies** · May 2016 – May 2019 · Nagpur, India — Java EE applications with reporting, deployed on AWS.
- **Java Developer — Naresh i Technologies** · Jun 2014 – Mar 2016 · Hyderabad, India — Java EE web applications.

INDEPENDENT ENGINEERING PROJECTS | JAN 2026 – SEP 2026

Founding Engineer (Co-Founder) — MyAgentFirm, multi-tenant AI agent platform *Apr 2026 – Aug 2026 · Nagpur, India*

- Built a Fastify (Node 22) backend with 24 API modules and JWT auth, 6 async background workers and, separately, 8 recurring cron loops.
- Ran the job queue on PostgreSQL (FOR UPDATE SKIP LOCKED, no broker) first, then replaced it with RabbitMQ in the second update.
- Wrote 23 PostgreSQL migrations and an atomic credit ledger across 11 pricing tiers that refunds automatically when a job fails.
- Integrated 12+ external APIs (Meta Marketing API, Twilio, ElevenLabs, Firebase Auth, Cloudflare R2) and LLM failover across DeepInfra → Groq → Together AI.

AI Engineer — AnnaRakshak AI (Google "Build with AI: Code for Communities" hackathon) *Sep 2026*

- Built a FastAPI service and three Vertex AI agents (Google ADK) on Cloud Run with read-only tools, human approval and an audit log.

Also built

- **TradingOS** (Feb – Apr 2026): Python data pipeline into TimescaleDB; migrated 221K+ bars and 1.78M flow events with zero data loss.
- **ChalOnline** (Jan – Feb 2026): SaaS taken to production in weeks (PostgreSQL, Redis, Razorpay).

EDUCATION & CERTIFICATION

- Diploma in Computer Technology — Late Vasantdada Polytechnic · 2016 · Nagpur, India
- Java Enterprise Development Certification — NareshIT · 2014 · Hyderabad, India
